

ENA WHITE 2.0

The fastest professional home bleaching

**NEVERMORE
ANNOYING BLEACHING
TRAYS OVERNIGHT!**

Patients who tried a bleaching system with trays will appreciate the comfort of **ENA® WHITE 2.0**

EASY AS TOOTH BRUSHING !

ENA® WHITE 2.0 is a special toothbrush with dispenser containing a bleaching gel which can be easily applied brushing the teeth for 1 minute twice a day.

Also the risk of swallowing the hydrogen peroxide bleaching gel is reduced: according to several researches, this risk increases with the standard system with tray due to the application time of 6/8 hours a day.

QUICK • EASY • SAFE
BLEACHING

Want to get white teeth
and a brighter smile
in only 2 minutes a day?

A whiter, brighter smile can give you more confidence and self-esteem improving social relationships

ENA WHITE 2.0
The fastest professional home bleaching

The tooth whitening performed in this practice is a painless effective treatment that eliminates stains due to smoking, coffee and colouring food giving you whiter teeth and a new bright smile

BEFORE AND AFTER

Before treatment

Final result

After an accurate diagnosis and a pre-treatment in dental office, introductory to the home treatment, we will give you this innovative bleaching system and will instruct you about how to use it for one minute twice a day to get the smile you have always dreamt of in a few weeks

ENA WHITE 2.0

With this innovative patented system the risk of irritation and sensitivity is reduced due to the shorter time of contact between the tooth and the bleaching gel in just 2 minutes a day.

Check the result with your dentist after about 15-20 days and if you are not satisfied with it you can proceed with a further phase of treatment
